

# TCHATT

## Texas Child Health Access Through Telemedicine

### What is TCHATT?

TCHATT is a free school-based telemedicine program to help identify and assess the behavioral health needs of children and adolescents.

### What can TCHATT offer my child?

- Our team of BCM mental health professional can meet with you and your child for an initial diagnostic assessment and follow up visits.
- We offer treatment planning to meet your family's unique needs.
- Depending on your needs, our team can facilitate transition to ongoing care and mental health services for your child.

### What are the advantages of using TCHATT?

- Evidence-based treatment– Therapy and/or medication management services are available and aligned with best practices and guidance.
- Convenient – As a telemedicine program we meet virtually for all appointments and offer flexible scheduling with little to no wait time.
- Free - Initial assessments and limited follow up sessions are offered at no cost.

### How can I access TCHATT?

- Please speak to your child's **school counselor** to request a referral to TCHATT
